COURSE OBJECTIVE

The purpose of this course is to teach candidates the Adult CPR/AED life support skills necessary to respond and give care in an emergency.

Once successfully completing this course, candidates will be certified to.....

- Respond in an emergency
- Ensure personal & bystander safety
- Gain access to the victim
- Get consent when providing care
- Determine whether any life-threatening conditions are present
- Provide needed care for the victim
- Summon more help when needed by activating the EM system
- Use techniques acquired from your training in the course

Perform.....

- Primary & Secondary assessment skills
- Rescuer breathing (Adult)
- One Rescuer CPR (Adult)
- AED Administration (Adult)

Once successfully completed this course, participants will receive an Adult CPR/AED Certification 1 year validation
